

NICK JAQUITH

ui developer & javascript engineer • <http://dngr.co>

profile

With a background in the visual arts, and a steadfast love for code, I develop applications with clear objectives, clean lines, and a penchant for getting the job done. I am a loyal workhorse, a student of human behavior, and a technically proficient engineer of interaction.

education

BFA, Illustration

Rhode Island School of Design
June 2004

skills

JavaScript

(es6, React, Angular, D3, jQuery),
HTML, CSS, Webpack/Gulp/Grunt,
Python, PHP, MySQL, Mongo DB,
JSP (ATG), Adobe CS.

Proficient with MVC development patterns, OOP principles, and the adaptive/responsive web.

experience

Plum Analytics (an EBSCO property) | 12/14 – present

UI Engineer

As part of a small startup team, lead key product decisions centered around migration from a legacy codebase and UX system, as well as product direction and technology modernization. Developed several new reporting tools to help users better analyze research data. Worked closely with Plum's product team to deliver improved customer experience and more useful data.

STACK: JavaScript (es6, React, Redux, CoffeeScript), Python, Node, HTML, CSS

- Created PlumX's Benchmarking tool to help organizations benchmark themselves against others.
- Charged with implementing a React-based component system, using Redux for state management, to work in tandem with legacy areas of the codebase. This allowed for continuous product improvement without the need for a "big-bang" replacement.
- In addition to product development, acted as UX and design lead.

Urban Outfitters | 6/13 – 11/14

Senior Front End Developer

Responsible for team leadership and supervision, as well as architectural oversight of multiple business facets. Cultivating strong working relationships with brand leaders and IT departments. Developing robust applications across disciplines and maintaining high working order in outward-facing code through code-review processes and mentorship.

STACK: JavaScript (Angular, jQuery), Java/JSP, Python, HTML, CSS, MongoDB

- Responsible for the complete re-architecture of urbanoutfitters.com product detail pages as Angular SPAs; launched in July, 2014 to rave reviews and an increase in sales conversion from ~1.75% to > 2.05%
- Acted as brand lead for the launch of URBN's cross-site unified checkout system.
- Built blogging/microsite framework that hooks into the content management front end of WordPress, while delivering content via MongoDB, Python, and AngularJS.

Neiman (now a&g) | 9/10 – 6/13

Developer

Responsible for the front end development of the majority of Neiman's digital work. Remained current with emerging trends in JavaScript, HTML, and CSS in order to efficiently produce well-designed, highly visible websites and applications.

STACK: JavaScript, PHP (ExpressionEngine, Wordpress, CodeIgniter), HTML, CSS

- Gold Addy Award Winner: paproblemgambling.com & controltonight.com
- Received high accolades for work with Neiman's internal R&D department, Neiman Labs

Ingram Digital | 5/08 – 9/10

Application Developer

Wrote succinct, object-oriented JavaScript as well as clean, semantic HTML & CSS to develop and design front end applications for Ingram's digital audio library.

- Successfully implemented a functional front end audio editing system using the HTML5 Web Database spec

iofy corporation | 1/07 – 5/08

Webmaster & Art Director

Administered iofy's web presence and marketing materials. Worked with development team to produce an expansive library of audio applications.
